experience

2021–Now | **Twilio** — Barcelona, Spain
Senior Software Engineer / Engineering Manager
Working in the Edge team, handling all Twilio traffic before sending it to the correct services. Helped automate tasks to improve our uptime and reliability, while also proposing new ideas that made integration better with our customers. Lead deprecations and migrations to make our service more secure and have better monitoring Since June I been working as an Engineering Manager for the Hatch program, a program to mentor non-traditional under-represented people to become Software Engineers. Leading all technical trainings and acting as EM and PM for the team during each 6 month cohort

2021–Now | **Moderator for Discord Moderator Program** — Barcelona, Spain
Moderator for various DMP communities
Help build brand new communities for different brands, while mentoring and training both the brand community team and new community members to take over the community and help it grow

2015–Now | **Community Volunteer for Minecraft/Microsoft** — Barcelona, Spain
Discord admin, MoJira moderator, Crowdin global proofreader
Tech support volunteer in the IRC channel, owner of the new community support discord, bug hunting for MoJIRA and chat moderator in the forums chat and twitch channel. Helping the Mojang development team maintain a clean JIRA tracker. Built and host several bots in https://github.com/mojira to automate various checks. Help train and mentor new members of the team, and building a better community

2020–2021 | **Dynatrace** — Barcelona, Spain
Senior Java Software Engineer
Worked on the Real time user monitoring team building the storage and processing layer to distribute processing of visits and their updates across servers while being performant and memory-efficient

2019–2020 | **Zopa** — Barcelona, Spain
Backend Engineer - Payments team
Worked in the Payments team building bank account and payments services from scratch, helped rewrite the .NET monolith to be more scalable and maintainable. Made public talks about functional programming. Core team for bank launch

2018–2019 | **N26** — Barcelona, Spain
Backend Engineer - Memberships
Worked in the Memberships team to help our customers find the tier that suits them. Helped separate a monolith into multiple microservices and managed the lifecycle of cards from ordering to activation and the integration to charge fees for the UK Participated in the Agile Champion and Security Champion programs and gave talks about Kotlin both internally and externally

2017–2018 | **Expedia, Globant Contractor** — Cordoba, Argentina
Java Developer
Worked as a contractor for Globant doing migrations to the new platform, developing a microservice architecture for bookings and hotel info and thinking and implementing new ways to improve customer conversion. Proposed and gave classes about Kotlin and Spring Boot 2.0 and was the local coordinator for the Argentina offices for the yearly Hackathon. Continuous Delivery Champion for my team.

2016–2017 | **Freelance** — Cordoba, Argentina
Android and Backend Engineer
Augmented reality application to test and buy glasses, E-Commerce website, stock management and payments integration and startup designing and implementing a new online chat system
